about

My work is guided by a strong belief in design as a problem-solving tool, as a way of recognizing and forming relationships between ideas and reality, and as a method for improving the connections between people and the products they use.

I'm a visual story teller and have a passion for creating meaningful design solutions and experiences for brands and audiences. When I'm not in front of my laptop you can usually find me at café, concert or playing with fire (see skills).
